LANCASTER COUNTY SOLID WASTE MANAGEMENT AUTHORITY

LCSWMA OVERVIEW

BATTERY EDUCATION

BATTERY COLLECTION DATA

LOOKING FORWARD

LCSWMA is a municipal authority that manages the municipal solid waste (MSW) and recyclables for Lancaster County, as well as the MSW for Dauphin County, Pennsylvania.

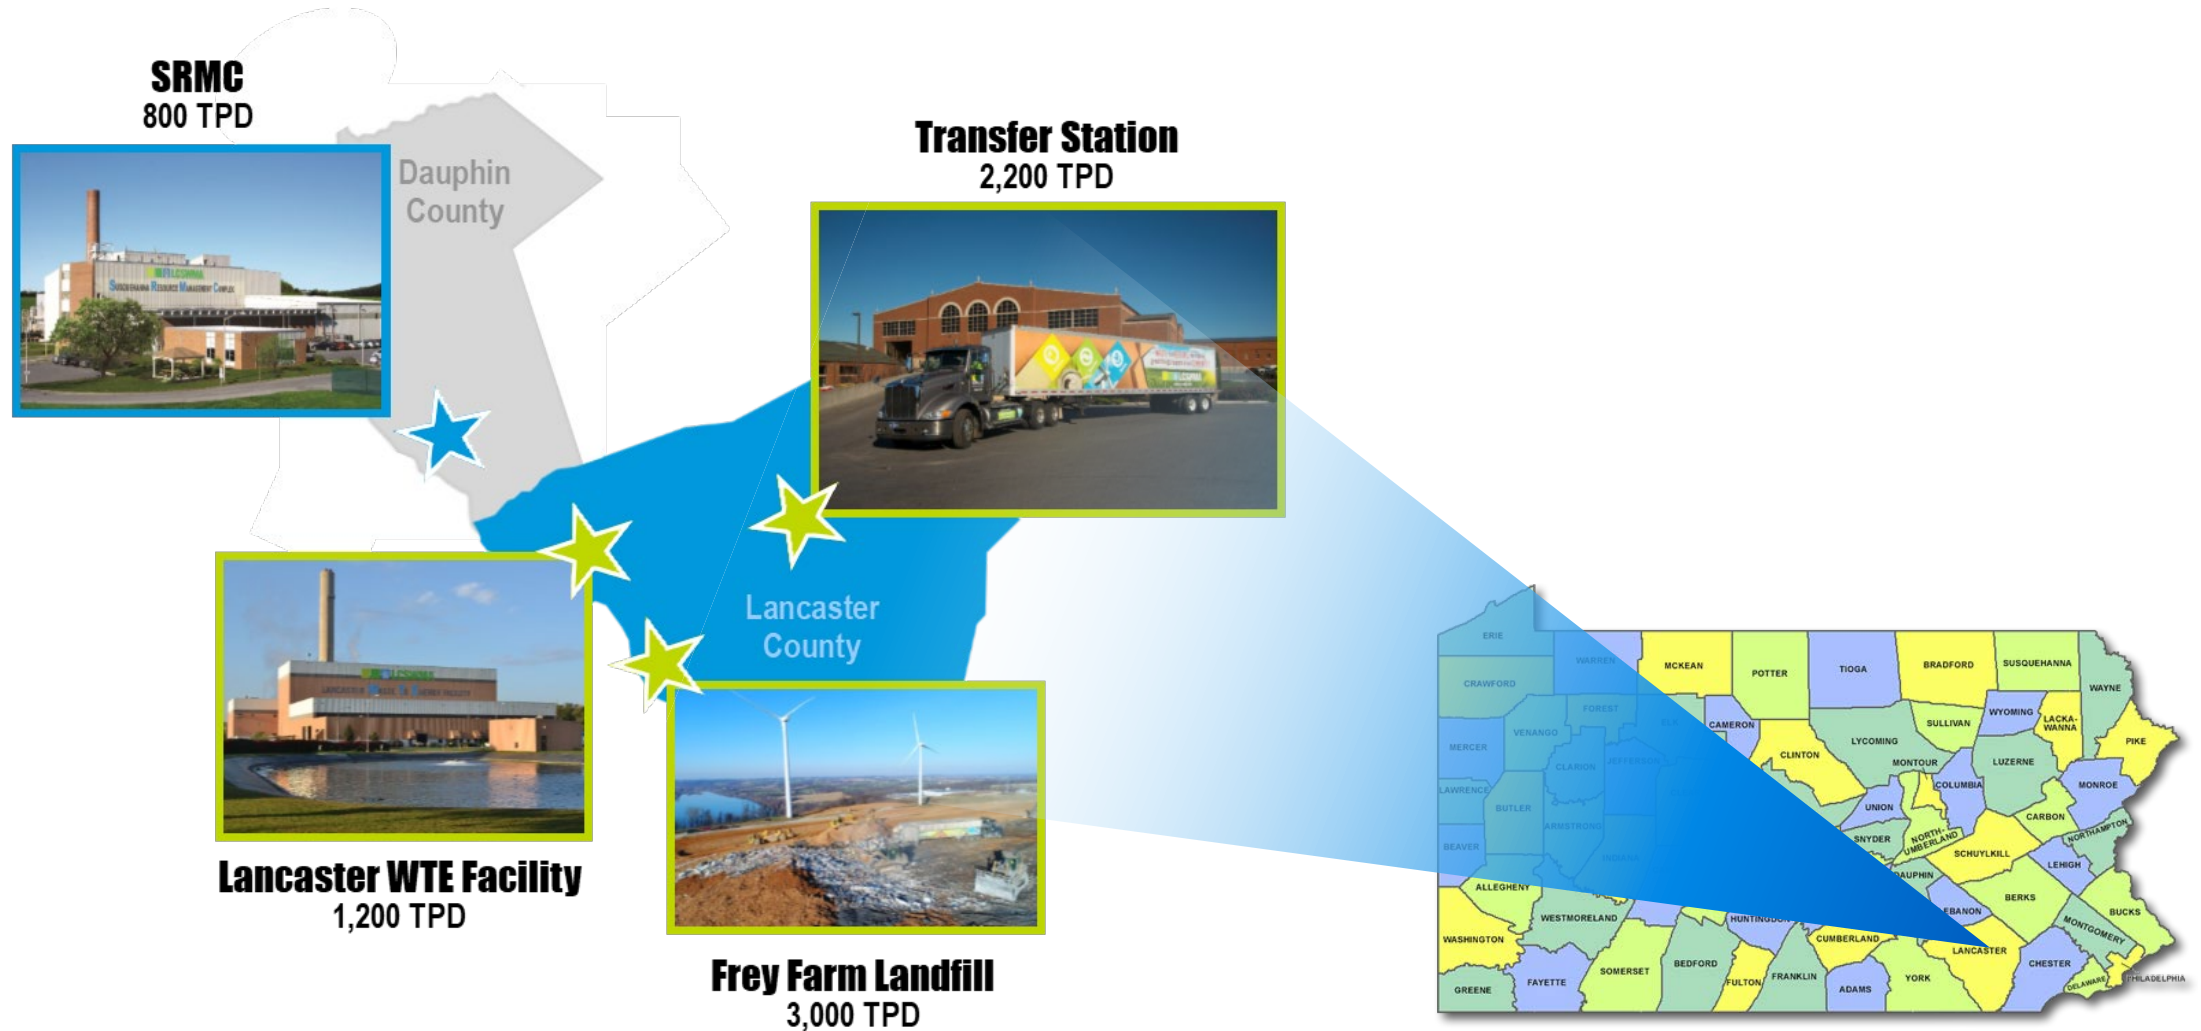

Our **Integrated System**, including four facilities, manages around **950,000 tons** of waste each year and is continually recognized for its innovative process.

We generate revenue (~\$100M annually) from tipping fees and the sale of electricity from our renewable energy projects. No tax money levied to support the system

A horizontal banner at the bottom of the slide with an orange background. It features the text "Rechargeable batteries are causing fires" in white. The banner is decorated with images of a yellow power drill, a black remote control, and a red toy car on the right side, and a yellow power drill and a blue USB cable on the left side. The LCSWMA logo is centered at the bottom of the banner.

Rechargeable batteries are causing fires
